# Purpose and summary of proposed rule:

Commission plans to rescind and adopt a new Chapter 24, pursuant to Executive Order 10. New Chapter 24 is proposed to ensure the Commission meets the requirements set forth in law by adopting rules for the administration of the Rural Iowa Primary Care Loan Repayment Program. The proposed rulemaking establishes the eligibility criteria and awarding of funds for the program; describes the process of awarding funds and tracking obligations; and illustrates the role of the Commission, applicants, and employers in the awarding process. The rulemaking also provides definitions for use under the program.

# **Analysis of Impact of Proposed Rule**

- 1. Persons affected by the proposed rule
  - Classes of persons that will bear the costs of the proposed rule:

In general, the proposed rulemaking does not impose requirements that would add administrative burden beyond the provisions already established in law. The rulemaking defines the processes that will be utilized to ensure eligible applicants receive awards and articulates the awarding of funds and general provisions of eligibility. Employers will need to verify completion of employment obligations under the program before a loan repayment award is paid.

• Classes of persons that will benefit from the proposed rule:

Eligible applicants, service commitment areas, and the Commission will benefit from the rulemaking since it clarifies the processes by which lowans will apply for and qualify for the loan repayment award.

Impact of the proposed rule, economic or otherwise, including the nature and amount of all the different kinds of costs that would be incurred

• Quantitative description of impact:

The rulemaking does not impose measurable costs beyond those imposed by law.

• Qualitative description of impact:

Employers are required to verify completion of the employment obligation. While this requirement is not specifically established in law, an alternative data source that could effectively replace the employer's timely verification of employment has yet to be found. The Commission has implemented similar requirements for employers in other programs and does not anticipate the administrative burden of the requirement to result in measurable cost. Ensuring the timely payment of the of the loan repayment award is a critical part of the effective operation of the program, and this cannot be done without the assistance of employers.

### 2. Costs to the state

- Implementation and enforcement costs borne by the agency or any other agency: The agency would incur minimal costs to implement and enforce the rule.
  - Anticipated effect on state revenues:

The proposed rulemaking is not anticipated to have any effect on state revenues beyond that of the legislation it is intended to implement.

3. Comparison of the costs and benefits of the proposed rule to the costs and benefits of inaction

The benefit of the proposed rulemaking is to publicly illustrate the process that will be used to consistently administer and award loan repayment funds and to articulate criteria and general provisions of eligibility.

The cost of inaction would be confusion in the process and criteria to be used in the application and awarding of funds under the program. In addition, the program could not be administered without employer verification of completed obligations of the eligible applicants.

4. Determination if less costly methods or less intrusive methods exist for achieving the purpose of the proposed rule

The rulemaking proposes an efficient administrative method of collecting applications and disbursing funding, reducing any administrative burden that otherwise might be introduced. The administrative method proposed for this program is the most cost-efficient method utilized by the Commission in the administration of state financial aid programs.

- 5. Alternative methods considered by the agency
  - Description of any alternative methods that were seriously considered by the agency:

No other methods were seriously considered by the Commission, since the method proposed is the most cost-efficient and seamless for all entities involved.

• Reasons why they were rejected in favor of the proposed rule:

The alternative methods were rejected because they would lead to additional burden on applicants, eligible institutions, and the Commission.

# **Small Business Impact**

If the rule will have a substantial impact on small business, include a discussion of whether it would be feasible and practicable to do any of the following to reduce the impact of the rule on small business:

- Establish less stringent compliance or reporting requirements in the rule for small business.
- Establish less stringent schedules or deadlines in the rule for compliance -or reporting requirements for small business.
- Consolidate or simplify the rule's compliance or reporting requirements for small business.
- Establish performance standards to replace design or operational standards in the rule for small business.
- Exempt small business from any or all requirements of the rule.

If legal and feasible, how does the rule use a method discussed above to reduce the substantial impact on small business?

The proposed rulemaking is not expected to impact small businesses.
