2025 Summary: Count-Related Information for AEAs

Special Education Enrollment Count Part B, Part C and Weighted Enrollment Count Date: Friday, Oct. 31, 2025

2025 Child Count reports will be run from ACHIEVE Iowa IDEA. IFSPs and IEPs may be processed whether or not the data pertain to the 2025 Count.

Overview

This document establishes the schedule and procedures to be followed for the certification and finalization of the 2025 state and federal child counts.

The purpose of the count process is to have an accurate and unduplicated child count file that reflects the actual circumstance of each child on a date that is established in state and/or federal law. For all children and students with disabilities in the state of lowa the established count date is the last Friday in October. This year the count date falls on **Friday**, **Oct. 31**, **2025**.

The data in the child count file are used to fulfill state and federal reporting requirements including the generation of 2025-26 state and local funding for Area Education Agencies and local districts and to some degree distribution of federal funding. The fund-generating portion of the count is referred to as the Weighted Enrollment Count. It should include children who have an IEP (possibly an IFSP) that recommends a weighted program model. It excludes children who are District Court Placed (9888) or Foster Care (9889) as well as out-of-state residents.

The 2025 child count data entry must be completed by **7 p.m. on Thursday**, **Nov. 13** with reports and certification affidavits processed and mailed to the Bureau by **Friday**, **Nov. 14 at 10 a.m.** All final adjustments must be made by **7 p.m. on Thursday**, **Nov. 13** in order that the final adjustments be made in the finalization of the post-count process.

Procedures

The schedule for the original certification and the subsequent final adjustment of the 2025 child count is listed in the following section.

In regard to the original certification of the child count, AEAs are to:

- 1. Generate the following Count report from ACHIEVE Iowa IDEA reports:
 - The Weighted Enrollment summary by district
 - Federal (I.D.E.A.) Count AEA summary
 - Federal (I.D.E.A) Count AEA summary Part C
- 2. Print and notarize the Weighted Enrollment, IDEA Part B and IDEA Part C affidavits. Note: These affidavits are posted on the Iowa Department of Education's <u>ACHIEVE webpage</u>, under the Training and Resources section and Special Education Enrollment Count.
- 3. Attach the notarized affidavit to the appropriate report and mail to the lowa Department of Education.

In regard to the final adjustment, AEAs are to:

- 1. Mail only the revised reports to the lowa Department of Education if changes or corrections to the data impacts any of the child counts. Do not resubmit the notarized affidavits.
- 2. Notify the Bureau, by email, that there are no changes to the original certification if there are no changes or corrections. Do not resubmit the notarized affidavits.

Last Update: October 2025

3. Notify the Bureau by email that the final adjustment is "Count Neutral" if changes or corrections to the data have no effect on the child count, but would make the file accurate. Do not resubmit the notarized affidavits.

In short, the Bureau should hear from each AEA on **Friday**, **Dec. 5**, **2025** in regard to the final adjustment status.

Corrections or changes will not be accepted by phone, the post-count processes to correct information shall apply. This is to ensure the final file is accurate and the changes are properly documented. The Department will be reviewing each upload for data that may require additional attention by AEA staff. This will be done throughout the certification process and could continue through November/December 2025 in order to achieve the most accurate data file possible for state and federal reporting purposes.

As part of the effort to finalize the child count, the Department strongly urges each AEA to document all changes made to the count file following the certification. Documentation on corrections should be maintained down to the student record. If necessary, the AEA could utilize such information in the event of an audit of the agency's child count.

Summary of State Weighted Enrollment Count

Federal Part B Report of Children Ages 3-21 Served and Federal Part C Report of Infants/Toddlers Ages Birth through Two Served 6

Data(a) and Time	Description
