	CPI (Crisis Prevention Institute) training equips participants with strategies to manage and prevent crises effectively. It focuses on de-escalation techniques to safely handle anxious, hostile, or violent behavior, aiming to reduce or eliminate the use of physical restraint. The training emphasizes improving relational approaches to foster a positive environment and prevent behavior escalation.

Designed to support preschool staff in identifying and implementing mathematical learning opportunities with preschoolers and examine the development of mathematical thinking in children ages 3 - 6. Content will include math standards from the Iowa Early Learning Standards, learning trajectories, lesson planning and intentional teaching strategies. Each participant will understand the progressions of early mathematics in numeracy, shape and spatial reasoning, patterns, and measurement and data. This course will allow for exploration of mathematical concepts children construct at this age and the processes for which children build an understanding.

Provides the participant with the skills necessary to manage a school greenhouse for effective experiential teaching and learning. Teachers will develop and practice teaching activities related to greenhouse ventilation, irrigation, artificial lighting, and other typical greenhouse environmental control systems. Participants will also develop skills in managing aquaponic and hydroponic systems with a focus on facilitating student learning.

	Content will connect how to use the personalized reading plan to meet guidance for the Early Literacy Implementation (ELI) legislation as well as Special Education guidance for student problem solving and general education interventions. We will investigate leveraging Panorama Student Success to meet the model plan components and how NWAEA can partner with schools to enhance universal, supplemental, and intensive tier instruction for students. This workshop is valuable in preparing districts to meet new literacy requirements and focus on strengthening systems to close achievement gaps.
