It is the policy of the Iowa Department of Education not to discriminate on the basis of race, creed, color, sex, sexual orientation, gender identity, national origin, gender, disability, religion, age, political party affiliation, or actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the *Iowa Code* sections 216.9 and 256.10(2), Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688) Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.).

If you have questions or grievances related to compliance with this policy by the Iowa Department of Education, please contact the legal counsel for the Iowa Department of Education, Grimes State Office Building, 400 E 14th St, Des Moines IA 50319-0146, telephone number 515/281-5295, or the Director of the Office for Civil Rights, U.S. Department of Education, 111 N. Canal Street, Suite 1053, Chicago, IL 60606-7204.

Executive Summary

The Iowa Department of Education collects information on joint enrollment in Iowa’s 15 community colleges. Jointly enrolled students are high school students enrolled in community college credit coursework. Most jointly enrolled students enroll through Senior Year Plus programs such as PSEO (Postsecondary Enrollment Options) and concurrent enrollment. Others enroll independently by paying tuition or enrolling in courses delivered through contractual agreements that do not meet the definition of concurrent enrollment. For more information about Senior Year Plus programs, please refer to the department’s [website](#).

This report consists of fiscal year and trend data on joint enrollment including headcount enrollment, credit hours, student demographics, and enrollment by program type and offering arrangement. All data included in this report is taken from the Community College Management Information System (MIS) and confirmed by each college, unless otherwise noted.

Some of the highlights of this report include:

- Enrollment grew to a record high of 38,283 (Table 1).
- Year-to-year growth was 14.2 percent, which was above the typical rate of growth. Average annual growth over the last five years was 8.4 percent (Table 1).
- Jointly enrolled students accounted for 25.7 percent of total community college enrollment (Figure 2).
- Joint enrollment accounts for 13.6 percent of total credit hours (Figure 3).
- Most students (78 percent) enrolled through courses delivered through a contractual agreement between a community college and school district (Table 4).
- Fifteen percent of students enrolled through Postsecondary PSEO courses (Table 4).
- Fifty-nine percent of joint enrollees were seniors in high school, and 32 percent were juniors (Figure 8).
- Approximately 51 percent of joint enrollees were female, a lower proportion than the total student body (Figure 6).
- Approximately 10 percent of joint enrollees had a minority racial or ethnic background, a lower proportion than the total student body (Figure 7).
- Of courses taken by jointly enrolled students, the most common subject areas are English language and literature, social sciences and history, and mathematics, followed by foreign language and literature and various career and technical disciplines.

About this Report:

This report summarizes joint enrollment in Iowa’s community colleges. Jointly enrolled students are high school students enrolled in community college credit coursework. This report contains fiscal year data for the state’s 15 community colleges reported through the Community College Management Information System (MIS) and confirmed by each college.

Joint Enrollment

Each year, tens of thousands of Iowa high school students enroll in community college credit coursework. The Department of Education refers to these students as “jointly enrolled.”

Joint enrollment of high school students accounts for more than a quarter of total community college credit enrollment and more than an eighth of total credit hours. Iowa is one of at least 46 states with statewide dual enrollment policies (Education Commission of the States, 2008). In Iowa, high school students enroll in community college credit courses in a variety of ways including through Postsecondary Enrollment Options (PSEO) courses, college courses offered through a contract between a local school district and a community college, and enrollment in a college course independently as a tuition-paying student.

While sometimes still referred to as “dual credit,” joint enrollment does not necessarily entail credit being issued at both the secondary and postsecondary levels. Some programs, such as PSEO and concurrent enrollment, require that credit be issued at each level, while other joint enrollment opportunities have no such requirement.

Most joint enrollment opportunities fall under the rubric of Senior Year Plus. This legislation, passed in 2008, consolidated and standardized several existing programs involving college credit opportunities for high school students including PSEO, concurrent enrollment (which entails supplementary weighting for local school districts), career and regional academies, and advanced placement. The Community College MIS captures

- **Joint enrollment grew to a record high of 38,283.**
- **Year-to-year growth was 14.2 percent, which is above the typical rate of growth.**
- **Jointly enrolled students accounted for 25.7 percent of total enrollment.**
- **Joint enrollment accounted for 13.6 percent of total credit hours.**

joint enrollment in three categories — PSEO, contracted courses (which may or may not be concurrent enrollment and generate supplementary weighting for the partnering local district), and tuition.

Joint enrollment in Iowa community colleges has steadily risen to a record high of 33,537 unduplicated students in fiscal year 2009 (Figure 1, Table 1). In fiscal year 2009, jointly enrolled students accounted for 25.7 percent of total enrollment (Figure 2). Since fiscal year 2003, joint enrollment has increased 114.7 percent or about 10.0 percent per year. Fiscal year 2010 had faster growth (14.2 percent) than the eight-year average — a sharp increase over the prior two years which saw slower growth.

Table 1 — Joint Enrollment (Headcount), by College: 2006-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS.

Enrollment growth of jointly enrolled students continued to outpace the rate of growth of total credit enrollment which soared 11.8 percent in fiscal year 2010. Enrollment of students not jointly enrolled in high school increased 11.1 percent after declining in fiscal years 2006 and 2007 and growing slowly in fiscal years 2008 and 2009.

The number of credit hours taken by each jointly enrolled student increased slightly from fiscal year 2009 with each jointly enrolled student enrolling in an average of 8.0 credit hours (Figure 4). The number of credit hours taken per jointly enrolled student has increased nearly one credit hour since fiscal year 2003. Special analysis in 2008 showed that jointly enrolled students take slightly less than three classes on average. Because high school students generally enroll part-time, they account for a smaller percentage of total credit hours than total enrollment (Figure 3). In fiscal year 2010, joint enrollment accounted for 13.6 percent of total credit hours.

The rate at which high school students enroll in community college coursework varies by local school district and community college region (Figure 10).

In fiscal year 2009, Northwest Iowa Community College had the largest percentage of total enrollment and total credit hours jointly enrolled (Figures 2, 3). Kirkwood Community College had the smallest percentage of enrollment and credit hours jointly enrolled. Statewide, 25.7 percent of community college students were jointly enrolled in 2010 and joint enrollment accounted for 13.6 percent of all credit hours delivered. Des Moines Area Community College had the largest number of jointly enrolled students and credit hours by a significant margin.

Nationally, public two-year colleges offer college credit coursework to high school students at higher rates than other sectors of higher education (Kleiner and Lewis, 2005). In 2005, 98 percent of public two-year colleges nationwide had high school students jointly enrolled in college credit coursework compared with 77 of public four-year institutions. In Iowa, delivery of programming to high school students is a part of the community colleges' mission (Iowa Code 260C.1) and, consequently, all 15 community colleges are committed to offering college credit opportunities to these students.

 NOTE: Each bar “|” denotes 3,500 credit hours.

Figure 3 — Joint Enrollment as a Percentage of All Credit Hours, by College: 2010

Joint Enrollment Offering Arrangements

Contracted courses had the largest enrollment of the three types of joint enrollment offering arrangements accounting for 77.9 percent of jointly enrolled students in fiscal year 2010 (Figure 5, Table 4). Enrollment in contracted courses rose 13.9 percent from the previous year to 32,380 students. PSEO, which accounts for 13.6 percent of joint enrollment, had a 3.7 percent decrease from fiscal year 2009. Enrollment of tuition paying students soared 46.0 percent in fiscal year 2010 after rising 20.7 percent in fiscal year 2009.

Jointly Enrolled Student Demographics

The typical jointly enrolled community college student, as with prior years, is female, 18 years old, and Caucasian. Compared with the overall student body, jointly enrolled students are proportionally more white and male. In fiscal year 2010, approximately 51.0 percent of joint enrollees were female compared with 55.6 percent of the overall student body (Figure

6). The phenomenon of proportionally greater male enrollment is driven by contracted course enrollment, which was 50.9 percent male in fiscal year 2010. In terms of gender, contracted course enrollment more closely mirrors high school enrollment than community college enrollment. In contrast, PSEO and tuition enrollment were 63.5 percent and 62.3 percent female respectively.

The racial/ethnic background of joint enrollees is less diverse than either total community college enrollment or public K-12 enrollment. In fiscal year 2010, approximately 10 percent of joint enrollees were reported as having a minority racial/ethnic background. Tuition course enrollment had the largest proportion of minority students (12.0 percent) followed by contracted (10.4 percent) and PSEO (4.1 percent). Hispanics were the largest minority group with 43.0 percent of minority joint enrollment followed by Black and Asian students with 23.0 percent and 19.2 percent respectively (Figure 7). In contrast, 13.7 percent of the overall community college student body was reported to have a minority racial/ethnic background, 45.5 percent of which were Black and 28.7 percent of which were Hispanic.
