

Iowa Chart of Account Coding

Quick Reference List to UFA Chart of Account Codes

Color-Coded Guidance for a Minimum Chart of Accounts

Developing an Accounting System using the Chart of Accounts

The accounting system is the means by which financial data are captured during operations, recorded in the books of account, and then analyzed to produce the various kinds of reports needed. Financial transactions can be classified to facilitate their accumulation of the categories needed on the required reports. The guidelines here provided a classification structure which will meet local needs and will provide comparability of reported data when reports from different LEAs are combined, compared, or both.

Uniform Financial Accounting classifies three basis types of financial activity: revenues and other sources of funds; expenditures and other uses of funds; and transactions affecting the balance sheet only. For each type of transaction, the specific account code is made up of combinations of classifications called dimensions. Each dimension describes one way of classifying financial activity. Each dimension is described in detail in Chapter 6. The following table shows the dimensions possible and required for each financial transaction for Iowa school districts and AEAs.

Dimensions	Format	Revenue and other sources of funds	Expenditures and other uses of funds	Balance Sheet
Fund	XX	Required	Required	Required
Facility	XXXX	Recommended	Required	Recommended
Function	XXXX	Optional	Required	Optional
Program	XXX	Required	Required	Required
Project	XXXX	Required	Required	Required
Object	XXX	Not applicable	Required	Not applicable
Source	XXXX	Required	Optional	Optional
Account	XXX	Not applicable	Not applicable	Required
Course Code		Optional	Optional	Optional
Job Classification		Not applicable	Optional	Optional

Note: Facility is a combination of operational unit and level of instruction.

Note: Districts and AEAs may add dimensions to the above list for any local purpose.

Districts and AEAs may link the dimensions in any order, providing that all the required dimensions for the financial transaction are utilized. The suggested structure is:

Revenues and other fund sources: Fund—facility—program—project—source

Expenditures and other fund uses: Fund—facility—function—program—project—object

Balance sheet accounts: Fund—facility—program—project—account

Fund Dimension

1. **Blue** Indicates Level of Coding Required.
2. **Red** Indicates Business Rules in addition to the following.
3. “Tax funds” refers to Funds 10, 22, 24, 25, 26, 28, 29, 36 and 40 only.
4. If a header is the required level of coding, the district could choose to use the detail instead.
5. If detail is the required level of coding, the district could not choose to use the header instead.
6. Use of header or detail must be consistently applied for that grouping throughout the chart.
7. If a header or the detail is **Blue**, but the District does not have that activity/fund/program, that District would not need to enter that unused header or detail code into its Chart of Account.
8. Generally, districts/AEAs cannot add account codes except where noted. However see the next three business rules.
9. If a header is defined and there are blank rows under that header, the district or AEA may assign locally detail that is a subset of that header as long as there is not a more appropriate code already assigned for the activity.
10. If a header is not defined, the district or AEA may not assign locally either a header or detail.
11. If a district/AEA wants greater detail for a single assigned code, it would use a district defined dimension for the additional detail rather than splitting the assigned code into multiple rows.
12. Districts may add additional dimensions as needed for local reporting.
13. Catalog of Federal Domestic Assistance (FAL/CFDA) numbers are now referred to as Federal Assistance Listings (FAL). This document has not been updated for the new terminology.
