

Explanation of March 2022 Special Education Excess Positive Balance Deduction from State Payment to School Districts -

If you had a 2020-21 special education excess positive balance, this amount is being deducted beginning with the March state foundation aid payment. These deductions will continue through the end of the fiscal year. Districts without the excess positive balance may also see a small change in their state aid payment (one-dollar increase or decrease) due to the March recalculation.

Questions regarding this deduction can be directed to:
