## Introduction

The purpose of the Regional Center Location Study project is to show regional planning partnerships, school districts, community colleges and their partners what a strategically designed network of regional center facilities could look like within their region as well as statewide. The analysis completed to produce this report and the accompanying web mapping portal, developed on behalf of the Iowa Department of Education, are intended to provide location options and information that will assist the regional planning partnerships and their stakeholders in site location planning and decision making to address the State's goal of ensuring "every student in the state of Iowa has convenient access to a regional center facility in order to access high-quality CTE programming."

The process and analysis undertaken to complete the Regional Center Location Study report and to develop the web mapping portal were shaped by input and guidance provided by staff from the Iowa Department of Education and the members of a Location Study Advisory Group that was established early in the project. These two groups provided useful information and valuable insights into the various factors that will influence and shape the decisions the regional planning partnerships, school districts, community colleges and other partners will be making regarding future regional centers.

The Department of Education has outlined a set of qualification criteria that must be met for a facility to be designated as a regional center (see Figure 1). Data and information were gathered and refined; and an analysis was undertaken to identify the high schools in the state that are currently unserved by an existing or planned regional center, and to identify potential locations to recommend for future regional centers to fill those gaps. During this phase, it became clear that determining what constitutes a good location for future regional centers would be challenging. Continual changes in the existing landscape as new regional centers are brought online, new potential locations are considered, and other existing school district and community college facilities and career academies are launched or scaled up force a point in time study that will likely have a few inaccuracies in CTE facility labels (e.g. regional center, career academy). In addition, school districts may change their participation levels for various reasons including program offerings and access to other CTE options. Given the rural nature of some unserved high schools, ensuring that students have acceptable access in the future may require that the Department of Education be flexible in their qualification criteria for regional centers by making exceptions in some cases.

*Figure 1: Qualifications for a Regional Center*

- Provide access to at least 4 career academy programs
- Must serve either:
  - ✓ A combined minimum of 120 students from at least two school districts OR
  - ✓ A minimum of four school districts (no student minimum)
- Must be in partnership with a community college

This report provides location recommendations for regional centers that could serve high schools that are currently not being served by an existing or planned regional center. Each recommended location includes the identification of potential partners for the regional center and how they might meet the regional center qualification criteria. The report also provides some background on the data and information that was used; and the techniques and tools utilized to complete the analysis process and determine the recommended locations.

The Regional Center Location Study project was completed by a consulting team from the University of Northern Iowa (UNI) and included individuals from the Institute for Decision Making (IDM), the GeoInformatics Training Research Education and Extension (GeoTREE) Center, and the College of Education's Department of Educational Leadership and Postsecondary Education.

## Location Study Advisory Group

The Location Study Advisory Group was established early in the project. The Advisory Group played a critical role in providing input to the UNI Team throughout the entire project. The Advisory Group helped guide the work of the UNI Team at various points during the process by providing insights into the decision-making criteria that regional planning partnership members use in determining whether to participate in a regional center and its programming. The Advisory Group also provided valuable input on the mapping application as it was being developed and on the suitability of the recommended locations.

The Advisory Group includes a representative from each of the regional planning partnerships and staff members from the Department of Education. The following individuals served as members of the Advisory Group:

Katie Gilbert  
Dean of High School Partnerships  
Northeast Iowa Community College

Steve Schulz  
President  
North Iowa Area Community College

Todd Abrahamson  
Superintendent  
Okoboji Community School District

Sara Breems-Diekevers  
Director of Student Development  
Secondary Programs, and Transitions  
Northwest Iowa Community College

Carrie Rock  
High School Partnerships Associate Dean  
Iowa Central Community College

MaryAnne Nickle  
Academic Dean  
Iowa Valley Community College District

Lynn LaGrone  
Provost/Vice President Academic Affairs  
Hawkeye Community College

Amy Gieseke  
Bureau Chief, Community Colleges  
Iowa Department of Education

Dennis Harden  
Bureau Chief, Career Technical Education  
Iowa Department of Education

Jason Crowley  
Consultant, Information & Analysis Services  
Iowa Department of Education

Gary Delacy  
Superintendent  
Clinton Community School District

Kristy Black  
Executive Dean of High School Partnerships  
Kirkwood Community College

Ken Slater  
Superintendent  
Hinton Community School District

Murray Fenn  
Consultant, Career & Technical Education  
Green Hills AEA

Matt Thompson  
President  
Indian Hills Community College

Chad Wahls  
Superintendent  
New London Community School District

Jen Rathje  
Consultant, Senior Year Plus/Career Academies  
Iowa Department of Education

Vlad Bassis  
Administrative Consultant/Community College MIS  
Iowa Department of Education

Jeff Fletcher  
Consultant, Perkins Accountability & Monitoring  
Iowa Department of Education

## Background

The UNI Consulting Team was notified in January of 2022 of the Iowa Department of Education’s intent to utilize the UNI Team for this Regional Center Location Study. Meetings with IDOE representatives began in February of 2022. These meetings covered a timeline discussion, the roles and responsibilities of the Advisory Group, UNI data and information needs, and the data available from IDOE. IDOE staff provided multiple existing datasets, and researched and developed a comprehensive inventory of existing or planned regional centers, and existing career academies or other CTE facilities not classified as “Regional Centers.” The inventory also included known information about the programs offered and the participating school districts. The inventory of facilities was refined multiple times as new information was provided by RPPs, community colleges, school districts, and Advisory Group members.

In mid-April 2022, the UNI Team presented an overview of the project, including the process, timeline and expected activities at an RPP Leadership Meeting. By August 2022, the Advisory Group had been recruited and the UNI Team had carried out preliminary analyses, discussed considerations for the interactive web map, and had developed substantial data visualizations. An Advisory Group meeting was held on August 17, 2022 to share progress thus far, review preliminary map samples and information, and get critical input and guidance from group members. Key discussion points included realistic maximum drive times for students, the data and mapping layers most informative for stakeholders in location decision making, as well as input on missing information noted by group members on preliminary map samples.

The UNI Team utilized the feedback from the Advisory Group meeting to refine the web mapping application, and IDOE staff continued to update the facility inventory. The Advisory Group met again on October 12, 2022. At that meeting the web mapping application was demonstrated to the Advisory Group for their initial feedback. The group was charged with testing the application after the meeting and providing input to IDOE’s project manager through a shared document.

By mid-January of 2023, the facility inventory updates were completed and the data included in the mapping application was updated to reflect the final inventory. All Advisory Group input was captured and adjustments to the layer displays on the web mapping application were completed.

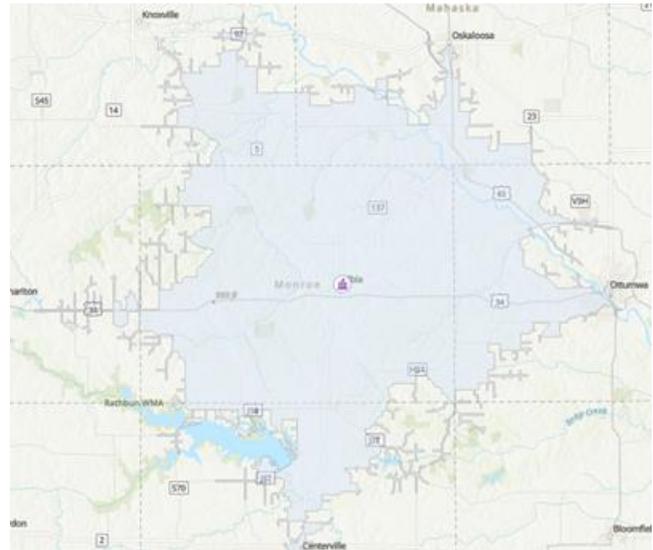

The UNI Team then reviewed each high school and its proximity to existing/planned or potential regional center locations utilizing the web mapping application and the facility inventory to develop recommendation charts. The specifics and resulting recommendations of the UNI Team’s analyses constitute the remainder of this report.

## GIS Database Development

Numerous datasets were compiled from a variety of sources, pre-processed, and built into a comprehensive Geographic Information Systems (GIS) database. The original data built into the GIS database formed the basis of spatial analysis to derive new data built into the GIS database. The GIS database feature classes or layers were then exported into a web-GIS format (GeoJSON) and built into the interactive web mapping application. In early stages of the project, a meeting between the UNI team and the Iowa Department of Education staff helped define data to potentially be included in the database and what the relevant source of those data was. Some of these data were relatively quickly sourced, processed as necessary (such as geocoding addresses), and included in the database. However, the definition of Existing, Planned, and locations with limited access (other career academies), and developing a comprehensive list of each, was an iterative process over many months. As the subsequent GIS, or spatial, analyses depended on these locations, multiple iterations of the analyses took place. The spatial analyses routines were developed in summer of 2022 and then refined over time as the center locations were defined more accurately and other parameters were further defined through discussions and meetings (such as preferred travel time for students to centers).

The feature classes (layers) built into the GIS database and/or derived via spatial analyses are outlined in Table 1 along with the source of those data and a description of the layer. ESRI's ArcGIS Pro Network Analysis tools (Generate Service Areas) were used to derive travel time bands away from each high school (N =335). Figure 2 illustrates an example (Albia High School). Originally multiple time bands were analyzed (10-60 minutes at 10-minute intervals). After discussion with the Advisory Group, it was decided that a maximum 30-minute travel time was a realistic threshold for travel by students to a regional center and travel beyond 30 minutes would become unrealistic. This 30-minute travel band was used to do a geographic, or spatial, selection of existing or planned centers, and locations with limited access (other career academies) that fell within that drive time. Based on this spatial selection, each drive time was assigned a value indicating whether a given type of center fell within that drive time and then that value was assigned back to the high school building point.

**Figure 2: Travel Band Example**

All of the data built into the GIS database were exported into files of a web-accessible format (GeoJSON) which were then built into the web mapping application.

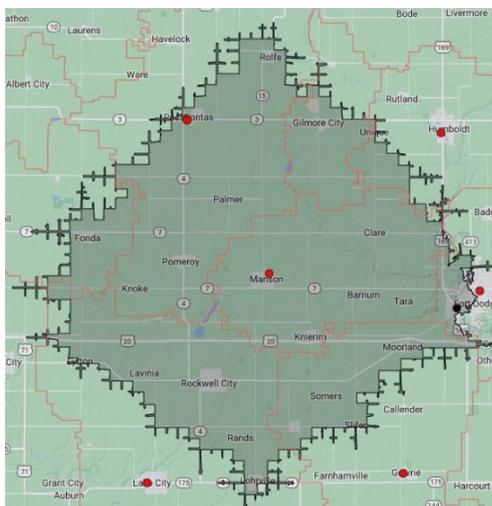

**Table 1: GIS Database Layer Information**

Feature Class/Layer	Source	Description
High School Locations	Iowa DOE	Geocoded locations from building addresses
High School Enrollment	Iowa DOE	Enrollment numbers joined to high school locations and proportionally allocated from School District future enrollment
School Districts with projected enrollment (thru 2026-27)	Iowa GeoData, Iowa DOE	Projections joined to school district boundaries and disaggregated proportionally to high school buildings
Community College Districts	Iowa GeoData	
Community College locations	Iowa DOE	
Existing, Planned, and locations with limited access (other career academies) and attributes	Iowa DOE in consultation with school district and Community College partners	An iterative consultation process led to the development of a complete list of locations and attributes of centers
Drive time polygons	Derived	30-minute drive time polygons away from high school buildings
*Iowa Department of Education data provided directly or downloaded from <a href="https://educateiowa.gov/data-reporting/education-statistics-pk-12#Student_Enrollment">https://educateiowa.gov/data-reporting/education-statistics-pk-12#Student_Enrollment</a>

## Web Mapping Application

An interactive web mapping application (<https://www.geotree.uni.edu/web/ideoe/>) which allows a variety of filtering, spatial interrogation, and visualization functionality was built to provide dynamic decision-support tools. The web mapping application was built on top of Google Maps with the layers developed in the GIS database described above (GeoJSON versions) layered on top of that base map. The user has the ability to turn on select layers (high schools, regional centers based on type, school and community college districts, as well as specific community college building locations). The user can also filter by Center and see which school districts are (potentially) served, programs offered, and historical and projected enrollment for the school districts served. The high school locations are split out by their access (within 30-minute drive time) to existing, planned, and locations with limited access (other career academies). It should be noted that individual high schools could have access to more than one type of location (i.e. 8 out of 180 high schools with access to existing centers also have access to planned centers). The 'No access' set of high schools are those with no access within a 30-minute drive time to any of the center types. If the user clicks on any high school, the 30-minute drive time polygon will display. The user can also click on any hypothetical location in the state and the application will dynamically calculate which high schools are within a 30-minute drive time from that location (uses Google Maps API) and display a list of those locations with their most recent enrollment number. The UNI Team utilized this web mapping application in deriving information that was used to construct this report and develop the recommendations.

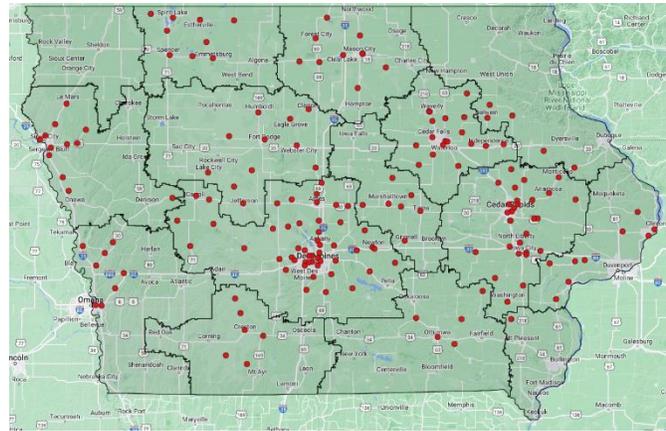

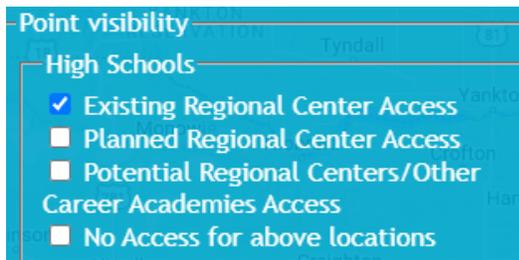

**Figure 3: A planned center (NCC Career Academy – Sioux Center) is selected and associated school districts, historical and projected enrollment, and potential programs are displayed.**

**Figure 4: High school information and 30-minute drive time polygon are displayed when user clicks on a high school.**

**Figure 5: User can filter high school based on access to center types.**

A more complete description of the functionality of the web application can be found at [https://www.geotree.uni.edu/web/idoie/IDOE\\_RegionalCenter\\_WebApp\\_UserGuide.pdf](https://www.geotree.uni.edu/web/idoie/IDOE_RegionalCenter_WebApp_UserGuide.pdf).

## Recommendations

As previously noted, the UNI Team, with input from the Location Study Advisory Group, determined that the maximum acceptable drive time from a high school to a regional center is 30 minutes. Based on this criterion, all high schools in Iowa were examined as to their proximity to one of three facility locations with the following descriptors:

**Existing Regional Center:** A facility that is currently operational and meets the criteria to be designated as a Regional Center.

**Planned Regional Center:** A facility that is currently being developed, is not operational, but will have met the criteria to be designated as a Regional Center upon the facility's opening.

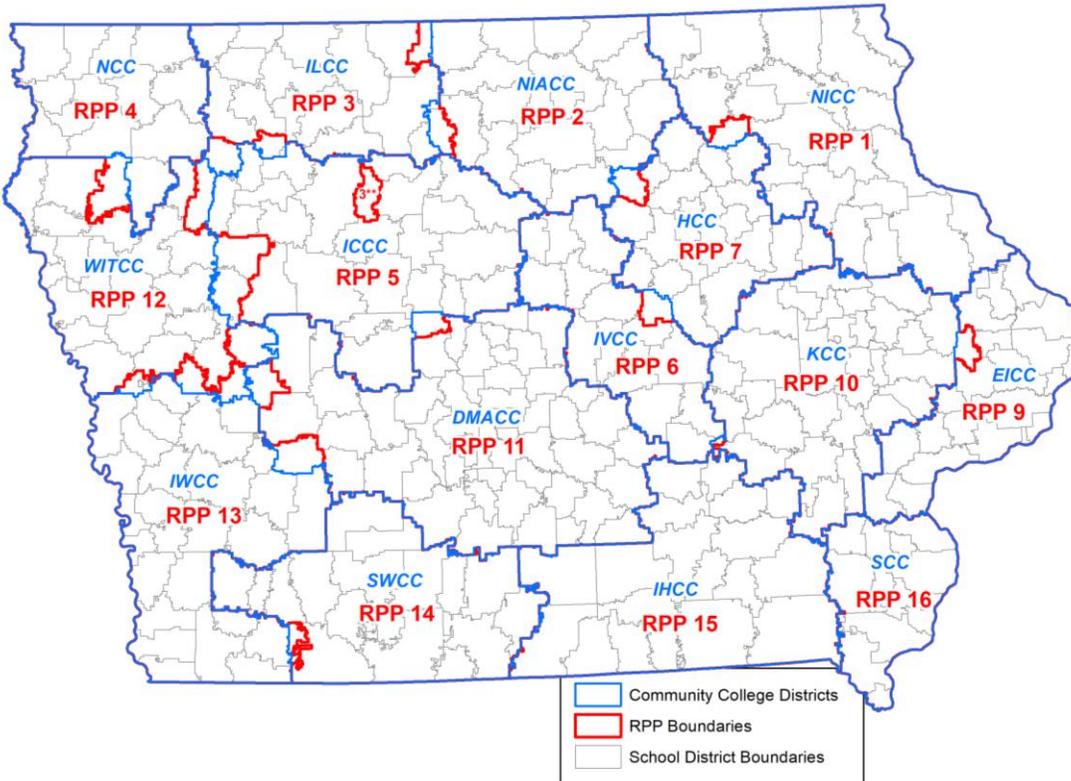

**Limited Access for Locations:** Various locations that may deliver one or more shared career academy programs, but do not meet the officially designated criteria to be identified as a Regional Center.

School district administrators, as well as students, choose their participation in career and technical education programs based on the programming offered by a Center or Career Academy, and as such, participation fluctuates from time to time, and programming continues to be adjusted to meet the interests of students as well as the needs of employers. As regional planning partnerships (RPP) consider how best to deliver high quality CTE programming with equitable access for all Iowa high school students, the education provider boundaries and RPP boundaries may need to be more flexible and partners more collaborative to allow for maximum student participation and subsequent Center success. The online mapping application can serve as a tool to help visualize these overlapping boundaries and understand possible partnerships for regional center development. As Figure 6 illustrates, stakeholder boundaries are not consistent, and with some school districts sharing high schools, or having no high school, utilizing a 30-minute drive time from a high school keeps the students' best interests in the forefront and assumes that stakeholders can be accommodating in location decision making.

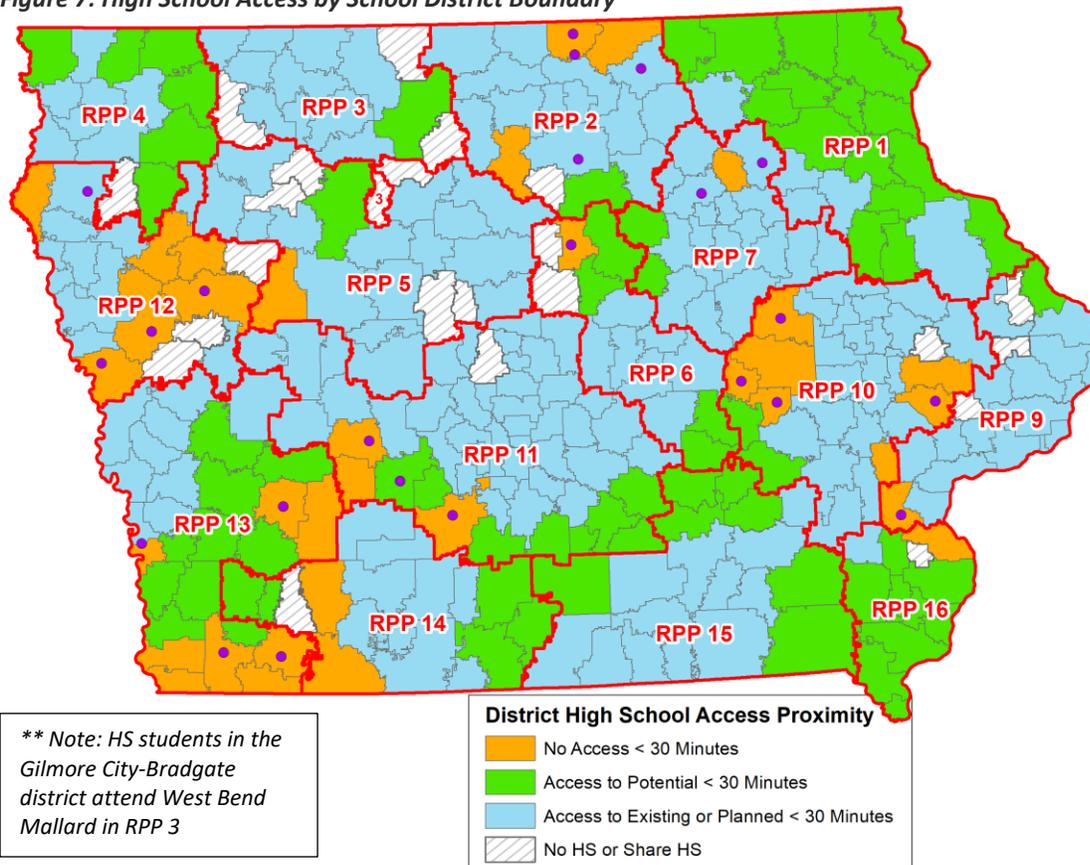

The following sections provide information for RPP stakeholders to use in combination with the mapping application in planning appropriate locations for future Regional Centers. Appendix A sorts this information by existing or planned facilities or locations with limited access (other career academies). Figure 7 provides a quick snapshot of where school districts stand in terms of whether or not their high schools are within a 30-minute drive time to regional centers, and further demonstrates the potential need for new collaborations. Every RPP has some school districts where the high schools are not within a 30-minute drive time of an existing or planned regional center. Elevating locations with limited access (other career academies) to meet regional center requirements may often be the solution, but high

schools with no acceptable access will need to consider multiple options to achieve equitable access to high quality CTE programming.

**Figure 6: The Boundary Dilemma**

**Figure 7: High School Access by School District Boundary**

## High Schools Served by an Existing or Planned Regional Center

Using a 30-minute drive time as the main parameter for identifying whether a high school has access to an existing or planned regional center, there are 220 high schools that should or could be participating in a regional center. The following table identifies those high schools that currently have acceptable access to an existing regional center or a currently in planning regional center with the names of those regional centers within a 30-minute drive time. It should be noted that being within a 30-mile access parameter does not necessarily mean that the school district is participating in the identified center listed in the table. In addition, school districts could also be participating in regional centers that are located beyond a 30-minute drive time from the high school location which may not be reflected in the table. Several of the high schools have access to other career academy programs that do not meet the full regional center requirements within the 30-minute drivetime and those are also included in the table.

**Regional Center Requirements:**

- Provide access to at least 4 career academy programs
- Must serve either:
  - ✓ A combined minimum of 120 students from at least two school districts
  - OR
  - ✓ A minimum of four school districts (no student minimum)
- Must be in partnership with a community college

### Potentially Served High Schools

There are 75 high schools that are not within a 30-minute drive time from an existing or planned regional center, but are located within a 30-minute drive time from additional locations that could become regional centers if their participation and programming were enhanced to meet the state’s regional center criteria. The following table lists those high schools and the locations with limited access (other career academies) that could be upgraded to be considered a regional center. For example, using the online mapping application, one can see that the Waukon Center in northeast Iowa currently offers four programs and there are four high schools within a 30-minute drive time, Eastern Allamakee CSD, Decorah CSD, Postville CSD and Allamakee CSD. Together, they meet the criteria and could develop a regional center in Waukon. If Decorah CSD and Postville CSD, whose high schools are already within a 30-minute drive time from a Regional Center do not wish to participate, other options are available such as meeting the enrollment minimum and going with two districts, or even increasing enrollment potential by including MFL MarMac CSD.

**Regional Center Requirements:**

- Provide access to at least 4 career academy programs
- Must serve either:
  - ✓ A combined minimum of 120 students from at least two school districts
  - OR**
  - ✓ A minimum of four school districts (no student minimum)
- Must be in partnership with a community college

School District - High School	Locations with limited access (other career academies) within 30 Minute Drive Time

Winfield-Mt. Union CSD - Winfield-Mt. Union Jr-Sr High School	SCC – Mount Pleasant Center

## Unserved High Schools

The following section focuses on those high schools that are considered “unserved” by either of the above options, i.e. they do not fall within a 30-minute drive of an existing or planned facility or locations with limited access (other career academies). This is not to say that they are not participating however. There are 33 high schools that fall into this category. Each unserved high school is identified below sorted by RPP; along with the school’s current enrollment, the projected percent of change in district enrollment from the 2022-23 through the 2026-27 school years<sup>1</sup>, the Community College District, and the Area Education Agency (AEA) service area in which it falls. Recommendations are made as to potential locations and identifies partners for each possibility. Wherever possible, existing Community College locations are identified as potential locations in order to leverage existing partner assets. In addition to the 30-minute drive time maximum recommended by the advisory group, recommendations consider the following Regional Center Requirements:

- Provide access to at least 4 career academy programs
- Serve either a combined minimum of 120 students from at least two school districts, OR a minimum of four school districts (no student minimum)
- Must be in partnership with a community college

### RPP 2

#### Belmond-Klemme Community Jr-Sr High School

<b>District:</b>	Belmond-Klemme Community School District
<b>Location (City, County):</b>	Belmond, Wright
<b>Community College:</b>	NIACC
<b>AEA:</b>	Central Rivers
<b>Current HS Enrollment:</b>	335 (includes 7 enrolled at the Alternative School)
<b>% Projected District Enrollment Change:</b>	-7.13%

#### Possible Options:

1. At the very edge of a 30-minute drive time for Belmond-Klemme high school students is the potential location in the Sheffield/Hampton area. Current discussions for that site include West Fork, Hampton-Dumont-CAL and Belmond-Klemme school districts. Continuing these ongoing discussions is likely the best option for serving Belmond-Klemme students. The community college Partner would be NIACC.
2. The NIACC Mason City Campus regional center technically serves Belmond-Klemme, but it is well beyond the 30-minute drive time preferred by the Advisory Group at approximately 50 minutes.

<sup>1</sup> Enrollment figures may differ slightly from the mapping application due to the timing of data releases. Building enrollment data is from the “2022-2023 Iowa Public School Building PreK-12 Enrollments by School, Grade, Race and Gender.” Projection percent of change figures were calculated from data in the “2017-2018 to 2021-2022 Iowa Public School Certified Enrollments and 2022-2023 to 2026-2027 Certified Enrollment Projections by District.” Sourced from the Iowa Department of Education, Bureau of Information and Analysis.

### Northwood-Kensett Jr-Sr High School

<b>District:</b>	Northwood-Kensett Community School District
<b>Location (City, County):</b>	Northwood, Worth
<b>Community College:</b>	NIACC
<b>AEA:</b>	Central Rivers
<b>Current HS Enrollment:</b>	273
<b>% Projected District Enrollment Change:</b>	4.10%

#### Possible Options:

1. The NIACC Mason City Campus regional center technically includes Northwood-Kensett, and is just slightly beyond the 30-minute drive time.
2. As both Northwood-Kensett and St. Ansgar are at the very edge of the 30-minute drive time, it may be worth exploring a Regional Center in Northwood or Kensett (given the smaller and declining enrollment in St. Ansgar). While these two districts would meet the IDOE Regional Center requirements by enrollment, Central Springs Community School District may also be interested in participating. The community college partner would be NIACC.

### St. Ansgar High School

<b>District:</b>	St. Ansgar Community School District
<b>Location (City, County):</b>	St. Ansgar, Mitchell
<b>Community College:</b>	NIACC
<b>AEA:</b>	Central Rivers
<b>Current HS Enrollment:</b>	171
<b>% Projected District Enrollment Change:</b>	-2.74%

#### Possible Options:

1. The NIACC Mason City Campus regional center technically includes St. Ansgar, and is just slightly beyond the 30-minute drive time.
2. As noted above, Northwood-Kensett and St. Ansgar are at the very edge of the 30-minute drive time, it may be worth exploring a Regional Center in Northwood or Kensett (given the smaller and declining enrollment in St. Ansgar). While these two districts would meet the IDOE Regional Center requirements by enrollment, Central Springs Community School District may also be interested in participating. The community college partner would be NIACC.
3. Another exploratory option for St. Ansgar is with Riceville and Osage. Currently, Riceville is a partner for the planned regional center in Charles City (just over 30 minutes), and the limited access (other career academies) locations in NICC Cresco Center (just under 30-minutes) and Calmar Center (just under an hour). Osage is also a partner of the planned regional center in Charles City. There are multiple districts that may utilize the Charles City planned regional center, so perhaps a new option for these three districts might offer more opportunities for students. Given the larger enrollment, Osage might be the best location option for this scenario, and NIACC already has the Osage Community Education Center in the community. The community college partners would include NIACC and NICC.

**RPP 5****East Sac County High School**

<b>District:</b>	East Sac County Community School District
<b>Location (City, County):</b>	Lake View, Sac
<b>Community College:</b>	ICCC
<b>AEA:</b>	Prairie Lakes
<b>Current HS Enrollment:</b>	395
<b>% Projected District Enrollment Change:</b>	-6.55%

**Possible Options:**

1. The Carroll Campus Career Academy technically includes East Sac, and is just slightly beyond the 30-minute drive time.
2. The Odebolt Arthur Battle Creek Ida Grove, River Valley, and Galva-Holstein high schools also fall outside of the 30-minute drive time of any existing, planned or limited access (other career academies) locations. A possible facility in Ida Grove could serve all four high schools. The community college partners would include Iowa Central and Western Iowa Tech.

**RPP 6****Iowa Falls - Alden High School**

<b>District:</b>	Iowa Falls Community School District
<b>Location (City, County):</b>	Iowa Falls, Hardin
<b>Community College:</b>	IVCC
<b>AEA:</b>	Central Rivers
<b>Current HS Enrollment:</b>	412
<b>% Projected District Enrollment Change:</b>	--11.58%

**Possible Options:**

1. The Iowa Valley Marshalltown Career Academy technically includes Iowa Falls – Alden, but it is a significant distance beyond the 30-minute drive time at about an hour.
2. Iowa Falls itself is likely a prime location for a regional center. Students from AGWSR, Eldora and possibly Hampton-Dumont would meet the criteria and could partner to develop a Regional Center. The Ellsworth Community College is located in Iowa Falls as well. The community college partners would include Iowa Valley, and possibly NIACC.

## RPP 7

### Tripoli Middle/Sr High School

<b>District:</b>	Tripoli Community School District
<b>Location (City, County):</b>	Tripoli, Bremer
<b>Community College:</b>	HCC
<b>AEA:</b>	Central Rivers
<b>Current HS Enrollment:</b>	185
<b>% Projected District Enrollment Change:</b>	5.96%

#### Possible Options:

1. Tripoli might benefit from a partnership with Sumner-Fredericksburg. The two districts coming together would meet the criteria for developing a regional center. With no logical midpoint community, Sumner-Fredericksburg has the larger enrollment, so Sumner is the most favorable location. The community college partner would be Hawkeye Community College.
2. Another option might be Waverly, Waverly-Shell Rock is currently not associated with any existing, planned or limited access (other career academy) facility. And while Clarksville is included in the planned NIACC regional center in Charles City, Waverly would be a much closer option for students. As a growing community, Waverly's new high school campus could be an opportunity for the RPP to consider as a Regional Center location. The community college partner would be Hawkeye Community College.

## RPP 9

### Columbus Community High School

<b>District:</b>	Columbus Community School District
<b>Location (City, County):</b>	Columbus Junction, Louisa
<b>Community College:</b>	EICC
<b>AEA:</b>	Mississippi Bend
<b>Current HS Enrollment:</b>	201
<b>% Projected District Enrollment Change:</b>	.99%

#### Possible Options:

1. The Muscatine Community College Career Academy technically includes Columbus and is at the eastern edge of the 30-minute drive time.
2. While not technically included, the Washington County Regional Center is located at the far western edge of the 30-minute drive time from the Columbus High School.
3. A third option could be a regional center in Columbus Junction itself. According to the drive time analysis, neither the Wapello nor Lone Tree high schools have access to an existing, planned or limited access (other career academy) facility within the 30-minute bound. Both are within a 30-minute drive time of Columbus Junction, where an Eastern Iowa Community College Center is also located. In addition, Winfield-Mt. Union may also be a good partner even though they are within a 30-minute drive time of a limited access (other career academy) facility, the SCC center location in Mt. Pleasant. Partnerships across RPP and community college boundaries would have to occur and include EICC, KCC, and SCC, with RPPs 9, 10 and 16.

## RPP 10

### Belle Plaine Jr/Sr High School

<b>District:</b>	Belle Plaine Community School District
<b>Location (City, County):</b>	Belle Plaine, Benton
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	193
<b>% Projected District Enrollment Change:</b>	-8.04%

#### Possible Options:

1. Belle Plaine, Benton and Iowa Valley are located such that a partnership to form a regional center in Belle Plaine makes sense geographically. Belle Plaine is the former location of Kirkwood's Tippie Mansfield Center, a possibility for reuse? A fourth school that might be a good partner is H-L-V in Victor. All four schools are in the Kirkwood Community College District.

### Benton Community Senior High School

<b>District:</b>	Benton Community School District
<b>Location (City, County):</b>	Van Horne, Benton
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	496
<b>% Projected District Enrollment Change:</b>	2.59%

#### Possible Options:

1. As noted above, Benton, Belle Plaine and Iowa Valley could partner to form a regional center in Belle Plaine, with an additional possible partner in H-L-V. All four schools are in the Kirkwood Community College District.
2. The Linn County Regional Center is at the far eastern edge of a 30-minute drive time from Van Horne, but Benton is currently not participating in programming there.
3. Vinton is a potential location for a partnership between Benton and Vinton-Shellsburg. Other partnering schools could include Union and North Tama. Although Union is technically served by the Waterloo Career Center, its students may have more CTE options if Waterloo is at capacity. Partnership could cross boundaries to include both Kirkwood Community College and Hawkeye Community College – and RPPs 10 and 7.

### Iowa Valley Jr-Sr High School

<b>District:</b>	Iowa Valley Community School District
<b>Location (City, County):</b>	Marengo, Iowa
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	229
<b>% Projected District Enrollment Change:</b>	-7.83%

#### Possible Options:

1. A Regional Center in Belle Plaine - see Options 1 for Benton and Belle Plaine.
2. An alternative to Belle Plaine, should the above partnership come to fruition, is Marengo. However, students in Van Horne would have a farther travel time.

### Vinton-Shellsburg High School

<b>District:</b>	Vinton-Shellsburg Community School District
<b>Location (City, County):</b>	Vinton, Benton
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	425
<b>% Projected District Enrollment Change:</b>	1.65%

#### Possible Options:

1. Vinton-Shellsburg is served by the Linn County Regional Center in Hiawatha and is at the very limit of the 30-minute drive time.
2. As described earlier, Vinton is a potential location for a partnership between Benton and Vinton-Shellsburg. Other partnering schools could include Union and North Tama. Although Union is technically served by the Waterloo Career Center, its students may have more CTE options if Waterloo is at capacity. Partnership could cross boundaries to include both Kirkwood Community College and Hawkeye Community College – and RPPs 10 and 7.

### Lone Tree Junior-Senior High School

<b>District:</b>	Lone Tree Community School District
<b>Location (City, County):</b>	Lone Tree, Johnson
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	214
<b>% Projected District Enrollment Change:</b>	-8.19%

#### Possible Options:

1. The Regional Center at the University of Iowa is just beyond the edge of a 30-minute drive time from Lone Tree, as is the Muscatine Community College Career Academy.
2. As mentioned above, a regional center in Columbus Junction could serve Lone Tree, Columbus and Wapello high schools and perhaps Winfield-Mt. Union. Partnerships across RPP and community college boundaries would have to occur and include EICC, KCC, and SCC, with RPPs 9, 10 and 16.

### North Cedar Jr/Sr High School

<b>District:</b>	North Cedar Community School District
<b>Location (City, County):</b>	Clarence, Cedar
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	294
<b>% Projected District Enrollment Change:</b>	-12.39%

#### Possible Options:

1. North Cedar is served by the Jones County Regional Center in Monticello, but travel time from Clarence to the Center is between 35 and 40 minutes.
2. North Cedar and Tipton could consider a partnership to develop a regional center in Tipton. While enrollments are similar, Tipton's projected enrollment decline is much smaller. In addition, Kirkwood Community College has a history in the community at the former Cedar County Center, creating a possibility for reuse? The community college partner is Kirkwood.

### Tipton High School

<b>District:</b>	Tipton Community School District
<b>Location (City, County):</b>	Tipton, Cedar
<b>Community College:</b>	KCC
<b>AEA:</b>	Grant Wood
<b>Current HS Enrollment:</b>	310
<b>% Projected District Enrollment Change:</b>	-3.54%

#### **Possible Options:**

1. Tipton is served by the Regional Center at the University of Iowa, but travel time from Tipton to the Center is about 35 minutes.
2. As previously mentioned, Tipton and North Cedar could consider a partnership to develop a regional center in Tipton. Enrollments are similar, but Tipton's projected enrollment decline is much smaller. The community college partner is Kirkwood.

### **RPP 11**

### Adair-Casey & Guthrie Center High School

<b>District:</b>	Adair-Casey & Guthrie Center School District
<b>Location (City, County):</b>	Guthrie Center, Guthrie
<b>Community College:</b>	DMACC
<b>AEA:</b>	Heartland
<b>Current HS Enrollment:</b>	215
<b>% Projected District Enrollment Change:</b>	-2.35% (Adair-Casey: 7.62%, Guthrie Center: -9.61%)

#### **Possible Options:**

1. Adair-Casey & Guthrie Center is served by the Green County Career Academy in Jefferson, but the drive time is beyond the 30-minute ideal threshold.
2. A possible partnership between Adair-Casey and Guthrie Center, West Central Valley and Panorama could provide an alternative for students that could reduce drive times from all high schools. Stuart being the largest community may be the best location for such a partnership, with Guthrie Center being the next best option. If located in Stuart, Earlham may be another partner, as Earlham is one of many high schools within a 30-minute drive to limited access (other career academy) locations in the Des Moines metro area. The community college partner is DMACC.

### Winterset Senior High School

<b>District:</b>	Winterset Community School District
<b>Location (City, County):</b>	Winterset, Madison
<b>Community College:</b>	DMACC
<b>AEA:</b>	Heartland
<b>Current HS Enrollment:</b>	565
<b>% Projected District Enrollment Change:</b>	-2.06%

#### **Possible Options:**

1. Winterset is served by the SWCC Creston Campus, but students have a 40 to 45-minute drive time to Creston.
2. Winterset could be a potential location for a new regional center partnering with Earlham, Martensdale-St. Marys and Interstate 35 CSD. Winterset is the largest population center of the four high school locations, and is in a location where the 30-minute drive times overlap for these high schools. All are within the DMACC community college district.

## RPP 12

### Akron Westfield Senior High School

<b>District:</b>	Akron Westfield Community School District
<b>Location (City, County):</b>	Akron, Plymouth
<b>Community College:</b>	WITCC
<b>AEA:</b>	Northwest
<b>Current HS Enrollment:</b>	192
<b>% Projected District Enrollment Change:</b>	5.75%

#### Possible Options:

1. Akron, Le Mars and Marcus-Meriden-Cleghorn CSD could form a partnership for a regional center in Le Mars. It is the largest of the three and Western Iowa Tech already has a presence in Le Mars. A partnership would include WITCC and Northwest Iowa Community College, and RPPS 12 and 4.
2. Akron is between 35 and 40 minutes from the existing regional centers in Sioux City, so could be an option with flexible scheduling.

### Ridge View High School

<b>District:</b>	Galva-Holstein Community School District
<b>Location (City, County):</b>	Holstein, Ida
<b>Community College:</b>	WITCC
<b>AEA:</b>	Northwest
<b>Current HS Enrollment:</b>	239
<b>% Projected District Enrollment Change:</b>	-13.34%

#### Possible Options:

1. As previously mentioned, Galva-Holstein, the Odebolt Arthur Battle Creek Ida Grove, River Valley, and East Sac County high schools all fall outside of the 30-minute drive time of any existing, planned or limited access (other career academy) facilities. A possible location in Ida Grove could serve all four high schools. Cross-border partnerships would need to occur as community college partners would include Iowa Central and Western Iowa Tech, RPPs 12 and 5.

### Maple Valley-Anthon Oto High School

<b>District:</b>	Maple Valley-Anthon Oto Community School District
<b>Location (City, County):</b>	Mapleton, Monona
<b>Community College:</b>	WITCC
<b>AEA:</b>	Northwest
<b>Current HS Enrollment:</b>	283
<b>% Projected District Enrollment Change:</b>	-15.07%

#### Possible Options:

1. Maple Valley-Anthon Oto CSD is to be served by the TECH Discovery Regional Center in Denison, but it will fall a bit beyond the desired 30-minute drive time.
2. Maple Valley-Anthon Oto and West Monona could partner to develop a regional center in Mapleton, where Western Iowa Tech already has a presence.
3. Given the projected enrollment decline in the Maple Valley-Anthon Oto CSD, a location in Onawa may also be suitable. Onawa and Mapleton are in the Western Iowa Tech and Community College district.

### Odebolt Arthur Battle Creek Ida Grove High School

<b>District:</b>	Odebolt Arthur Battle Creek Ida Grove CSD
<b>Location (City, County):</b>	Ida Grove, Ida
<b>Community College:</b>	WITCC
<b>AEA:</b>	Northwest
<b>Current HS Enrollment:</b>	306
<b>% Projected District Enrollment Change:</b>	-13.45%

#### **Possible Options:**

1. Odebolt Arthur Battle Creek Ida Grove CSD is to be served by the TECH Discovery Regional Center in Denison, and will be at the edge of the 30-minute drive time recommendation.
2. The previous option for a location in Ida Grove could be more advantageous to district students. The partners proposed were River Valley, Galva-Holstein, and East Sac County high schools. Cross-border partnerships would be Iowa Central Community College and Western Iowa Tech Community College, and RPPs 12 and 5.

### River Valley Junior- Senior High School

<b>District:</b>	River Valley Community School District
<b>Location (City, County):</b>	Correctionville, Woodbury
<b>Community College:</b>	WITCC
<b>AEA:</b>	Northwest
<b>Current HS Enrollment:</b>	168
<b>% Projected District Enrollment Change:</b>	-7.44%

#### **Possible Options:**

1. Correctionville is an approximate 32-minute drive from the regional center at the WITCC Sioux City Campus.
2. Once again, River Valley, Galva-Holstein, the Odebolt Arthur Battle Creek Ida Grove, and East Sac County high schools all fall outside of the 30-minute drive time of any existing, planned or limited access (other career academy) facilities. A possible location in Ida Grove could serve all four high schools. Cross-border partnerships would include Iowa Central Community College and Western Iowa Tech Community College, and RPPs 12 and 5.

### West Monona High School

<b>District:</b>	West Monona Community School District
<b>Location (City, County):</b>	Onawa, Monona
<b>Community College:</b>	WITCC
<b>AEA:</b>	Northwest
<b>Current HS Enrollment:</b>	204
<b>% Projected District Enrollment Change:</b>	1.32%

#### **Possible Options:**

1. West Monona is to be served by the Larry and Bunny Buss Regional Academy in Missouri Valley, but the drive time ranges from 40 to 45 minutes. Missouri Valley is in the Iowa Western Community College district, RPP 13.
2. As previously noted, West Monona and Maple Valley-Anthon Oto could partner to develop a regional center in Mapleton, where Western Iowa Tech Community College already has a presence.
3. A location in Onawa may also be suitable. Onawa and Mapleton are in the Western Iowa Tech Community College district.

**Atlantic High School**

<b>District:</b>	Atlantic Community School District
<b>Location (City, County):</b>	Atlantic, Cass
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	485
<b>% Projected District Enrollment Change:</b>	-2.42%

**Possible Options:**

- Both Atlantic and CAM high schools are located outside of the 30-minute drive time bound of any existing, planned or limited access (other career academy) facility. There are a few other schools nearby, and while they may be within a 30-minute drive time, or identified as participating in other centers, they could benefit from a possible partnership to develop a regional center much closer for their students. The community of Atlantic is favorably situated for a site that could serve Atlantic, CAM, Griswold, and Exira-Elk Horn-Kimballton. In addition, Iowa Western Community College already has a presence in the community through its Cass County Center. This potential partnership would work well to provide coverage in that part of the state, and could also attract students from AHSTW and Riverside.

**CAM High School**

<b>District:</b>	CAM Community School District
<b>Location (City, County):</b>	Anita, Cass
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	143
<b>% Projected District Enrollment Change:</b>	-15.51%

**Possible Options:**

- As noted above in the Atlantic High School options, a potential partnership exists to serve both CAM and Atlantic high schools through a new center in Atlantic.
- If the possible partnership to serve Adair-Casey and Guthrie Center, West Central Valley and Panorama proposed in RPP 11 is formed and identifies Stuart as the best location for such a partnership, CAM high school students would be able to access a center there in less than 30 minutes. The community college partners would include DMACC and IWCC.

**Lewis Central Senior High School**

<b>District:</b>	Lewis Central Community School District
<b>Location (City, County):</b>	Council Bluffs, Pottawattamie
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	927
<b>% Projected District Enrollment Change:</b>	2.55%

**Possible Options:**

- Located within the Council Bluffs metro area, Lewis High School falls outside of the 30-minute drive time of any existing, planned or limited access (other career academy) facility. While the following high schools do fall into a 30-minute drive time of some locations, they are not identified as participating schools: Council Bluffs CSD (2 high schools), Underwood, Treynor, and Riverside. Noting this, a regional center formed in Council Bluffs is a sensible option. The Iowa Western Council Bluffs Campus is located with easy access in Council Bluffs and makes Council Bluffs an optimal location for a regional center.

### Shenandoah High School

<b>District:</b>	Shenandoah Community School District
<b>Location (City, County):</b>	Shenandoah, Page
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	259
<b>% Projected District Enrollment Change:</b>	-10.87%

#### **Possible Options:**

1. There are a cluster of high schools in the southwest corner of Iowa that are unserved, including Shenandoah. Potential sites in Red Oak and near the East Mills Elementary outside of Hastings could serve other nearby high schools, but given their locations near Shenandoah, some of these schools with access to potential sites might be better served by a new regional center formed to provide access to some of the unserved schools. The community of Shenandoah would be a logical location for a new regional center that could serve Shenandoah, Essex, Sidney and Hamburg high schools. Iowa Western Community College already has a presence in the community through its Page/Fremont County Center. Although this study recommends a different optimal location for them, both South Page and Clarinda high schools are within a 30-minute drive time of a possible regional center in Shenandoah.

### Hamburg Charter High School

<b>District:</b>	Hamburg Community School District
<b>Location (City, County):</b>	Hamburg, Fremont
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	35
<b>% Projected District Enrollment Change:</b>	-7.89%

#### **Possible Options:**

1. As a new charter high school (fall of 2022) the Hamburg Charter High School is providing CTE for its students. If necessary, Hamburg could join the partners as laid out in the Shenandoah High School option 1.

### Sidney High School

<b>District:</b>	Sidney Community School District
<b>Location (City, County):</b>	Sidney, Fremont
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	222
<b>% Projected District Enrollment Change:</b>	-6.79%

#### **Possible Options:**

1. Sidney is identified as part of the discussions for a possible upgrade to the Southwest Iowa Regional Career Academy near Hastings to become a regional center. The career academy is just beyond the 30-minute drive time.
2. If a regional center were to be developed in Shenandoah (as described in option 1 for Shenandoah High School), the drive time for students would be much shorter.

### Clarinda High School

<b>District:</b>	Clarinda Community School District
<b>Location (City, County):</b>	Clarinda, Page
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	484
<b>% Projected District Enrollment Change:</b>	-1.89%

#### **Possible Options:**

1. Clarinda is one of a cluster of high schools in the southwest corner of Iowa that are unserved. A regional center located in Clarinda could possibly serve Clarinda, South Page and Bedford high schools. Iowa Western Community College has a presence in Clarinda through its Clarinda Campus. In addition to Iowa Western Community College, SWCC could be a community college partner.
2. Clarinda High School is within a 30-minute drive time of Shenandoah and could participate in a possible partnership as described in option 1 for Shenandoah High School.

### South Page Senior High School

<b>District:</b>	South Page Community School District
<b>Location (City, County):</b>	College Springs, Page
<b>Community College:</b>	IWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	56
<b>% Projected District Enrollment Change:</b>	-7.88%

#### **Possible Options:**

1. The most optimal solution for serving South Page students is a possible regional center in Clarinda (see Clarinda High School option 1).
2. A second option would be to partner in a possible regional center in Shenandoah (See Shenandoah High School option 1)

## **RPP 14**

### Bedford High School

<b>District:</b>	Bedford Community School District
<b>Location (City, County):</b>	Bedford, Taylor
<b>Community College:</b>	SWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	243
<b>% Projected District Enrollment Change:</b>	11.76%

#### **Possible Options:**

1. Bedford is included in the area to be served by the Ringgold Center. Mt. Ayr is just beyond the preferred 30-minute drive time from Bedford.
2. Should a regional center be developed in Clarinda (see Clarinda High School option 1), it would be a shorter drive for Bedford students.

### Southwest Valley High School

<b>District:</b>	Corning Community School District
<b>Location (City, County):</b>	Corning, Adams
<b>Community College:</b>	SWCC
<b>AEA:</b>	Green Hills
<b>Current HS Enrollment:</b>	209
<b>% Projected District Enrollment Change:</b>	-3.74%

#### Possible Options:

1. Southwest Valley is included in the area served by the regional center in Creston. Southwest Valley appears unserved because the distance between the two locations is just beyond the 30-minute drive time. Because of Corning's location, this is likely the best option for Southwest Valley students.
2. Students from Southwest Valley could also access the limited access (other career academy) facility in Red Oak in about the same amount of time.

### **RPP 16**

### Wapello Senior High School

<b>District:</b>	Wapello Community School District
<b>Location (City, County):</b>	Wapello, Louisa
<b>Community College:</b>	SCC
<b>AEA:</b>	Great Prairie
<b>Current HS Enrollment:</b>	193
<b>% Projected District Enrollment Change:</b>	-5.59%

#### Possible Options:

1. Wapello is just beyond the 30-minute drive time from the existing Regional Center in Muscatine and could be an option to serve Wapello students, crossing RPP and community college boundaries to partner with EICC and RPP 9.
2. Another option is the previously mentioned new regional center in Columbus Junction, partnering with Columbus and Lone Tree high schools (See Columbus High School option 3).

### **Summary of Recommendations for "Unserved" High Schools**

#### RPP 2

High School	Possible Options	Potential Partnering Districts	Community College
Belmond-Klemme Community Jr-Sr High School	Potential Location currently being discussed in Sheffield/Hampton area	West Fork, Hampton-Dumont-CAL	NIACC

	Muscatine Community College Career Academy	Those already participating	EICC, SCC

## Conclusions

Most high school students in the state of Iowa are currently well-served by available CTE programming, whether through a “regional center” or through other shared career academy programs. There are 220 high schools that are within a 30-minute drive time of an existing or planned regional center, 75 high schools within a 30-minute drive time of facilities that currently offer career academy programming, and 33 high schools that fall outside of that preferred perimeter. High schools may or may not be sending students to these nearby opportunities, and some may be participating in opportunities beyond the 30-minute perimeter. This report identifies several options for the 33 high schools that fall outside of the perimeter, including 23 opportunities where it might make sense to place a new<sup>2</sup> regional center facility based on the location analysis. Through the Advisory Group discussions, it is clear that participation decisions are based on available programs, ease of transportation, and timing (whether class schedules align among parties). As RPPs work to ensure access to a regional center for all high school students, this inventory should provide guidance and possibilities for high schools and their partners.

---

<sup>2</sup> By “new” it is presumed that no known career academy programs currently exist.

## Appendix A

The following tables identify each existing or planned regional centers and the high schools within a 30-minute drive time; and the locations with limited access (other career academies) and the high schools within a 30-minute drive time.

### Existing or Planned Regional Centers

Note: **Red font** indicates schools with **no other regional center options** within the table.

School District - High School	RPP
<b><i>Ames Hunziker Center Career Academy</i></b>
